April 29, 2022

Dear Colleagues:

Please find the attached article which appeared on April 13, 2022, [usatoday.com](https://www.usatoday.com). Unfortunately, this reporter's insight into voter fraud was neither available for our recent series of hearings nor our floor debate regarding security questions involving our elections. The article does indeed confirm that there are attempts at voter fraud, that those incidents appear to be few, and most importantly, regardless of how egregious the attempt, the security checks work!

Maybe if we as a body were not looking so intently at a particular party for voter fraud or security breaches, we may investigate the actual events of voter fraud or security breaches. Which I would think, would present actual common-sense solutions, without relying on outside private interest funding of audits or elections.

Thank you.
